ROLLA, MO., WEDNESDAY, MARCH 19, 1947

NUMBER 22

Holiday Train Wreck Proves Fatal To Springfield Girl

An eighteen-year-old Springfield girl, in Rolla for the annual St. Patrick's Day celebration, was killed Thursday night when the automobile in which she was riding was struck by the westbound Frisco passenger train at the 18th street railroad crossing here.

The girl was Paula ("Sonny") Savage and she was rushed to the Springfield Baptist Hospital by ambulance. Her companion, David Lightfoot, 23, also of Springfield, a former student at the School of Mines, was not injured.

Authorities said they believed the automobile which Lightfoot was driving had become stalled on the railroad while attempting to cross the track. Police and railroad officials said they believed that Lightfoot had left the vehicle to go to get aid. After the oncoming train he backed back to the automobile.

Railroad officials said that apparently Lightfoot had missed the crossing and had traveled down the railroad right-of-way instead of down the street, since the automobile was on the track nearly 100 feet south of the crossing at the time of the crash.

Hazardous Crossing

The crossing where the crash occurred was described as extremely hazardous since the road was parallel to the railroad for several hundred feet, then cuts sharply to the left to cross the tracks again and follows the railroad for several hundred more feet. Railroad officials said they believed that Lightfoot became confused and drove his vehicle down the railroad right-of-way instead of down the regular road.

Treated Here

Miss Savage was given emergency treatment at the scene and was rushed to the Waynesville Hospital by Null and Son ambulance. She was treated here by Dr. F. A. Elders, local physician, who described her condition as "serious." After again receiving emergency treatment at Waynesville she was taken to Springfield Baptist Hospital where she passed away Saturday morning.

The automobile, a 1940 Chevrolet coupe, was demolished. School of Mines records revealed that Lightfoot was a student at the School of Mines in 1941 and completed three semesters of work at MSM. His home address was given as 805 East Elm Street, Springfield while Miss Savage resided at 1819 South Pickwick, Springfield.

Pictures Of St. Pat's On Display At Esquire Now

Ray Grass, Manager of the Esquire Photo Studio, announced yesterday that pictures covering the celebration three days St. Pat's celebration from beginning to end are now on display at the Esquire Photo Studio. The display of photos were made open to the public for special interest of the multitude of persons who attended St. Pat's. Those likenesses appear in the pictures, the manager announced. Most of the pictures appearing in this paper are on display at the studio. The pictures in the studio begin with several shots of floats at the train meeting their guests as they arrive. The photos taken with the after dance frolics on Saturday night, and the several shots taken at each fraternity on Thursday night, and the complete set of St. Pat's pictures will remain on display through the next week.

Students Pool Tuxedos—MISSOURIA, Mont. (UP)—Montana State University men solved the problem of "whose shall I wear tonight?" This group and fish went on the trade when fraternities, through the interfraternity council, set up a "tuxedo exchange," pooling all available dinner jackets for formal social events.

Some say that Mother Nature failed to do her bit, she never made a guy or gal with lips that didn't fit.

Bell Aircraft Man To Speak At A. S. M. E. Tonight

Tonight at 7:30 p. m. the MSM Student Branch of the American Society of Mechanical Engineers will meet in the lecture auditorium of the Old Chem Building. Mr. C. L. Fay, assistant to the Vice-President in charge of Engineering of the Bell Aircraft Corporation of Buffalo, New York, will be the guest speaker.

Two Motion Pictures

Mr. Fay will present two technical sound motion pictures—"Report on Jet Propulsion" and "The Modern Magic Carpet." The latter film deals with the Bell Helicopter.

Following the motion pictures and Mr. Fay's talk there will be a short business meeting of the ASME branch. All Mechanicals, whether members of the ASME or not, as well as all others interested in modern aircraft are cordially invited to attend the meeting, by the organization.

MILITARY NEWS

A new War Department Policy states that former officers, now in college, who will graduate by the 15th of July or complete graduate work by that time are wanted in the regular army. This applies to the air corps, the ground forces, and all branches of service.

The War Department is doing this to enable the officers, who went out of the army in order to finish their education, to come back in and have as good a job as they would be able to obtain in civilian life. This will also be a benefit to the army by increasing the number of the college type officers, which inevitably increases the stand of the organization.

INSPECTION

An informal inspection of the School of Mines ROTC Unit will take place on Wednesday, April 2. On this day Lt. Colonel D. Katsarsky, representative of the Missouri Military District will inspect class room methods, appearance of troops, methods of training, and the administration.

The annual formal inspection of troops will not be held until May 22 and 23.

PROMOTIONS

Cadet Sgt. Bernard La Rose has been promoted to the rank of Staff Sergeant, being transferred from Co. B to Co. C. Cadet Cecil Hollingsworth has been transferred from Co. A to Co. B to serve as Sgt.

CAFETERIA NOTICE

A new system has been arranged to accommodate those students desiring only two meals per day at the cafeteria. The method of obtaining the tickets are still the same except for the difference in cost. The price of the two meals will be \$1.00 per day while the regular three meals per day tickets remain at \$1.27.

Globe-Trotting Romance Has Happy Ending At St. Pat's

One of the more serious but undoubtedly least regrettable results of the St. Pat's holiday happened during the Formal Dance last Saturday night when Miss Charlotte Horesi of Chicago and Memphis decided Dick O'Brien of the Engineers' Club and Sutton, West Virginia, had followed her far enough and accepted his ring. Their romance started at the age of six in Kansas City when they first met. Some years later it was continued in Korea where the parents of both parties were connected with the Corn Products Refining Company and they attended a missionary school together. While both were in their early teens, an around-the-world vacation taken jointly by their families helped cement their friendship. A few years before the war, both families returned to the States and, by a coincidence, both moved to Chicago.

"The war years were the longest we were ever separated," said Dick. When asked what date had been set, he stated it would be some time in August if he could find lodgings.

Miss Horesi at the present holds the position of Stewardess with the Chicago-Southern Airlines. Dick is a Sophomore here at MSM registered in the Met Department.

Rollamo - Miner Board of Control Reorganized Now

The MSM Student Council met Tuesday evening, March 11, for a regular session. At the meeting, the Miner - Rollamo Board of Control was re-activated, all new members being appointed, Yokum Kelley and Buchanan are the student representatives appointed to the Board from the student council. The council also elected professors Jelinek and Rideout to be the faculty members of the Board of Control. Senior officers of the Miner, and Rollamo staffs complete the membership of the Board, which functions, primarily, to control the distribution of funds in the two organizations.

The student council is investigating the advisability of its taking over control of class elections, about which many complaints have been lodged. A committee composed of Kelly and Hepp has been appointed to study methods of balloting, nominations, and control of procedure, and to make recommendations at the next meeting. In event that the council votes to assume control of class elections, a standard method of notification, checking of eligibility, nominating, and balloting will be adopted and enforced for all such elections.

Preparations are underway for a benefit show to be sponsored by the student council. The present intention is that a benefit show be given once each semester, the proceeds to be available to aid students who suffer losses due to fire, storms, or similar accidents. This policy has previously been discussed, and its revival was instigated by the recent warehouse fire in which several MSM students lost possessions. Bob Jahnke heads the benefit show committee.

Plans were discussed concerning possible revival of Freshman class rules and the collection of Freshman class dues beginning with the next fall semester. It was stated that the C. V. A. and the Interfraternity Council both favor the enforcement of pre-war Fresh rules.

CAFETERIA NOTICE

A new system has been arranged to accommodate those students desiring only two meals per day at the cafeteria. The method of obtaining the tickets are still the same except for the difference in cost. The price of the two meals will be \$1.00 per day while the regular three meals per day tickets remain at \$1.27.

Sigma Xi Plans Joint Meeting For Next Tuesday

Dr. J. D. Forrester announced that the Rolla Group, Society of the Sigma Xi will meet jointly with the Rolla Chapter, Missouri Society of Professional Engineers, in Room 103, Old Chemistry Building, on Tuesday, March 25, at 7:30 P. M.

Dr. M. J. Caldwell of the MSM Chemistry Department will speak at the meeting on "These Compounds Called Vitamins."

Preceding this meeting a dinner will be held at 6:00 P. M. at Montgomery's Rendezvous and members of Sigma Xi, Missouri Society of Professional Engineers, and guests are welcome.

Reservations for attendance at the dinner should be made with Mr. Frank Bates not later than Monday noon, March 24. Mr. Bates' phone number is 4111. He can be contacted by letter to the Stuart Apartments, Rolla, Mo.

Wilson Speaks At A.I.M.M.E. Meet In N.Y.

Dean Curtis L. Wilson gave an address Sunday, March 16, 1947, at the annual meeting of American Institute of Mining Engineers in New York City, on "The Future Trends of Mineral Industry Education."

The following faculty members of MSM attended this meeting too: Dr. A. W. Schlecten, Dr. D. S. Epelsteiner, and Dr. H. R. Hanley from the Metallurgy Department; Dr. O. R. Grawe from the Geology Department; and Dr. J. D. Forrester from the Mining Department.

A paper written on "The Production of Lithium Metal by Vacuum Metallurgy," by Dr. Schlecten and W. J. Krell, will be presented at a joint meeting of the Nonferrous Metallurgy Division and the Institute of Metals Division.

Dr. Forrester is chairman of the program and meetings committee, Mineral Industry Education Division AIME.

This meeting was to begin on March 16 and end on March 22, 1947.

Student Talents Make Good On AIEE Programs

Last Wed. night March 12 over 100 students and guests watched Jovial Jim Stevens, Pres. of the MSM Student branch of the American Institute of Electrical Engineers, run what he called "a student participation program." The idea is to give the students a chance to do some research and some practice in reporting before large audiences.

Jim Wylie, a student at MSM, explained the system of automatic telephone dialing. The backbone of the whole thing is the "Stroger Switch," which is a switch whose movements are controlled by the number and timing of the signals sent to it. The signals are sent out by the dial and the particular number dialed gives the number of signals to the switch. The main reason for the two letters in the phone number is to help people remember the telephone number and the switch is only controlled by the number of impulses and an "A" and a one made no difference in the signal sent.

Jim Ranes and Robert Hansen then combined brains in an effort to explain the operation and uses of the amplicone or dynamo-zenerator. The amplicone, which looks for all purposes like an ordinary motor, has the useful trait of being able to turn out a steady voltage, current, or number of revolutions per second. This factor is the main basis for its usefulness as it can be used to control and govern other mechanisms and systems. Hansen then demonstrated how by merely turning a small light wheel, by means of the amplicone, a large wheel, several tons in weight could be made to turn exactly the same amount.

This was used during the war in tuning radar antennas. The operator tuned his set by turning a small wheel, which was turning a huge aerial the same amount despite its heavy weight.

In closing the meeting Stevens promised more of the same type of program in the immediate future with the next one being devoted entirely to Frequency Modulation.

Local AIME To Sponsor Essay Contest Here

The MSM Student Chapter of the AIME is sponsoring an essay contest open to all members of the chapter. The prizes are donated by Jesse Steinmensch, a MSM graduate. To enter, members should write an essay of two thousand words of a technical nature on any phase of mineral industries. The essays must be original, unpublished, and not submitted for other awards. The essays must be finished and submitted to one of the chapter officers by May 15th.

The essays will be read and carefully judged by a committee of three judges from outside the school. Prizes of \$25, \$15, and \$10 will be awarded to the authors of the three essays judged best.

All essays submitted in the chapter contest will be forwarded to the St. Louis section contest with a chance at the national award if they win in St. Louis.

St. Pat's Holidays Lead Way To Biggest Celebration In MSM's History

Bruce Williams To Address Students Here Next Wed.

Mr. Bruce Williams of the Bruce Williams Laboratories, Joplin, Missouri, and member of the Missouri State Board for Registration of Architects and Engineers will be the speaker for the Missouri Society of Professional Engineers' lecture series Wednesday evening, 8 P. M., March 26, 1947, in Parker Hall.

Mr. Williams' subject will be "Registration of Engineers." He will discuss this important subject under the following subheadings:

- (a) What does registration imply.
- (b) What is the objective in terms of social ends.
- (c) How desirable.
- (d) How extensive.
- (e) Reciprocity.
- (f) Engineer-in-Training.
- (g) Examinations.
- (h) Classification.
- (i) Code of ethics.
- (j) How infractions are punished.
- (k) Actions of Board.
- (l) Procedure of Board.
- (m) How Board is informed of violations.
- (n) Profession to do its own policing.

The question of registration is for every engineering graduate. Therefore, the reasons for the registration of engineers and the effect of such a law may have on your future professional standing and advancement should be of vital importance to every engineering student at MSM.

Mr. Williams is a graduate Chemical Engineer, a past President of the Missouri Society of Professional Engineers and present Engineer-Member of the State Board of Registration. Mr. Williams is eminently qualified to answer questions regarding this important subject and his talk will be a combination of the various professional aspects that have been discussed by previous speakers on this program. Every student who is interested in his future professional career can not afford to miss Mr. Williams' talk.

Turkish Student, Sahap Aybat, Speaks At Jr. H.

Last Wednesday morning Sahap Aybat gave a short talk to an assembly of the Rolla Junior High School on the subject, "Turkish Schools." "It was the first time I ever gave a speech in English," said Aybat. "I think I'd like to try again sometime."

Aybat, needless to say, is one of the Turkish students on the campus. He came to this country at the beginning of last summer and spent three months learning enough English to start classes in the fall semester. He is registered in the Mining Department and a member of the Engineers' Club.

Many of the organizations around Rolla have been taking advantage of the educational opportunity presented by the foreign students attending MSM.

Sigma Xi Plans Joint Meeting For Next Tuesday

Dr. J. D. Forrester announced that the Rolla Group, Society of the Sigma Xi will meet jointly with the Rolla Chapter, Missouri Society of Professional Engineers, in Room 103, Old Chemistry Building, on Tuesday, March 25, at 7:30 P. M.

Dr. M. J. Caldwell of the MSM Chemistry Department will speak at the meeting on "These Compounds Called Vitamins."

Preceding this meeting a dinner will be held at 6:00 P. M. at Montgomery's Rendezvous and members of Sigma Xi, Missouri Society of Professional Engineers, and guests are welcome.

Reservations for attendance at the dinner should be made with Mr. Frank Bates not later than Monday noon, March 24. Mr. Bates' phone number is 4111. He can be contacted by letter to the Stuart Apartments, Rolla, Mo.

Bruce Williams

Real Hillbilly Music At C. V. A.

Veterans from Brooklyn, New York City, and other points East will have an opportunity to hear and see some real honest-to-gosh hillbilly music tonight at the regular monthly meeting of the Campus Veteran's Association.

The music will be provided by the Vienna, Missouri Legionnaires, featuring "Grand Pappy" Coffey and 6 other talented players. This group has performed before many audiences in and around Jefferson City. The meeting will be held in Parker Hall Auditorium beginning at 7:30 P. M. All veterans are welcome. Refreshments will be served.

HISTORY REPEATS?

When the first atomic bomb exploded in New Mexico, the desert sand turned to fused green glass.

This fact, according to the magazine "Free World," has given certain archaeologists a turn. They have been digging in the ancient Euphrates Valley and have uncovered a layer of agrarian culture 8,000 years old, and a layer of herdsman culture much older, and a still older caveman culture. Recently they reached another layer of fused green glass.

Estelle Liebling Singers Score Smash Hit Here Mon.

by John Warsing

On Monday afternoon, March 17, the Estelle Liebling Singers presented a highly successful program of fine music in Parker Auditorium.

This is a masterpiece of understatement for, according to Professor Lloyd, the Master of Ceremonies, "This is the finest music we have heard at this school in a long time." The thunderous applause and the persistent demand for encores by the audience showed its agreement.

The program, nicely balanced, consisted of selections from Torelli, Schubert, Brahms, Schumann, Bizet, Donizetti, Grieg, Herbert, Gershwin and Berger.

The high spot of the afternoon was Miss Beverly Sills' rendition of "Chacun Le Saint" from "The Daughter of the Regiment." Rather difficult, through her it became a thing of sheer, gripping beauty.

The fine mezzo-soprano voice of Miss Emily Kalter left little to be desired in the lilting "Habanera" from "Carmen."

Mr. Garfield Swift gave a masterful artistic expression to "Tu Lo Sai" and "El Callejon." In "A Lavadeira" he employed to the fullest a fine voice and a fine talent for pantomime.

Misses Florence Deyerle, Susan Yager and Carolyn Gillette were remarkably able in Schubert's "Like Melodies My Thoughts Come Drifting."

As Norina and Dr. Malatesta in a duet from "Don Pasquale," Miss Liebling for a number of years. The background music, woven

Lovely Miss Louise Freeman, Queen of Love and Beauty.

Snow And Flu Epidemic Stop St. Pat's Movies

Last Monday Mr. Rowe Carney, Manager of the Uptown Theater announced that he was unable to take the moving pictures of the St. Pat's Celebration as he had planned.

Mr. Carney gave several reasons why the pictures were unable to be taken. First of all, Mr. Harry Blunt, former Pathe News Cameraman, who was going to do the actual photographing, was in bed with the flu. Mr. Carney tried to get help from St. Louis and Kansas City but was unable to obtain it. He also stated that even if he had the help that pictures of the parade would not be able to be taken because of the bad weather.

Mr. Carney declared that he was far more disappointed than anyone else in this venture but stated that maybe things may be better next year and that the pictures may be able to be taken then.

Each of the maids carried bouquets of pink, rose and white snapdragons.

The procession continued with four young members of the court, Miss Ann Freeman, Miss Jimmy Perry, Master Tobey Hefel, and Master Danny Jim Harris. The little ladies were dressed in pink and blue and carried nosegays of tiny flowers. The young gentlemen wearing smart black velvet suits and white satin shirts.

Miss Louise Freeman, Queen of the Court of Love and Beauty, entered with all the majesty and splendor of a real queen, walking down the aisle to receive the crown from St. Patrick himself.

Gowned in white brocade satin, a dress fashioned with puffs of brocade at each hip, leg-of-mutton sleeves, sweetheart neckline, and a very long train falling from her waist, Her Majesty smiled to all as she walked to her royal place in the court. Gorgeous red American Beauty roses made up her arm bouquet.

With the presentation of St. Patrick and his Queen and court came the climax of the masquerade ball.

Most unusual costumes were worn at the ball, representing people from all walks of life, from all periods. There were two Greeks, a Patrician and Greek goddess, costumes representing Arabia, Scotland, Mexico, Spain, Iceland, China and people from all walks of life in America, from baseball players to the policeman of barber shop quartet days.

Perhaps the most unusual costumes were worn by two couples who were dressed as white rabbits, and a girl dressed in a white clothes bag with green hook. There were clowns, pirates, hula dancers, Indians with feather headdresses, touching the floor, bobby soxers, one "P. W. Afrika Korps", a doctor and a nurse, Daniel Boone, early Americans in hoop skirts and powdered wigs, a ballerina, "The Egg" and his partner "and I", a young sailor lad with balloons on a stick.

One of the men was wearing a red print blouse and red skirt with a reg wig tied with green bows. Another had a mop for a wig.

Many were "wearin' the green", green skirts, dresses, ties, and hats. It was a gala occasion for all. Alvino Rey and his orchestra played for the ball.

Notes on the Troupe

Mr. Jean Berger—International known concert pianist and symphonic composer. Popularly known for his "Harmonica Symphony" composed for Larry Adler.

Mr. Garfield Swift—Featured baritone on General Motors and Prudential radio program.

Miss Emily Kalter—Mezzo-soprano with Chicago Light Opera Company and San Carlo Opera Company.

Miss Beverly Sills—Lyric Soprano. Toured United States and Canada as Countess Maritz in "The Merry Widow." Also in Gilbert and Sullivan's operettas.

Miss Susan Yager—Best known for her work in operettas.

Miss Florence Deyerle—Solo artist in Baltimore Opera Company. Sang with John Thomas and Robert Reedy.

Miss Carolyn Gillette—Associated with Phil Spitalny and the "City Center Opera Company of New York City."

All singers of this group except Miss Liebling for a number of years. Mr. Swift have been students of years.

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Tuesday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo., under the Act of March 3, 1879. Subscription Price 75c per semester. Single Copy 5c. (Featuring Activities of Students and Faculty of M. S. M.)

THE MISSOURI MINER Office is located on first floor of the Old Power Plant Bldg. Office Phone is 551.

It's Up To The Senate

The School of Mines received a sizable boost in its funds from the Appropriations Committee of the Missouri House last week, but the members of the lower body saw fit to reject the MSM request for two buildings on the campus.

The bill now goes to the floor of the House where it will be perfected, and when passed will move on over to the Senate for further consideration.

In the Senate is the most logical place for the building request to be put back into the School of Mines bill. It is with the Senate that the responsibility has been placed to answer the dire needs of the school and to give it the needed funds for construction of the buildings.

The need is evident. As Dean Curtis L. Wilson put it when he appeared before the House committee recently, "students are literally hanging out the windows at MSM" so crowded is its physical plant.

The completion of the Chemistry Building and the construction of the Mineral Industries Building are vital needs of the school — almost as important as the appropriation of funds for the general operation of the institution.

In order to write a clear record of having provided adequately for the University of Missouri and its School of Mines, the Senate must add the building request to the bill. Consideration of that problem should be given Number One priority in the Upper House during this week.

Pi Kappa Alpha

The big event of the past week-end was when handsome Walt Stevens finally broke down and pinned his favorite girl, Sally Dushner of Port Washington, N. Y. It seems as though a few of the boys from the house just couldn't wait until Thursday to start St. Pat's so a short session was had at Bob Phillip's house Wednesday night that lasted until late morning. Thursday night, however, the festivities really got under way, and the open house party at the house on the highway turned out to be a big success. Saturday evening prior to the dance an informal buffet supper was served. Some of the recent alumni that were present for the parties and dances were F. P. Paul '42 and D. L. Trish '41.

Sigma Pi

The big week end finally ended with a multitude of hangovers. Stangland, Logan and Kueser finally gave up late Sunday afternoon and went to bed, after accusing everybody else of being "Party Poopers."

A candlelight dinner was held Saturday evening at the house, after which everyone attended the dance. A house party was held after the dance and lasted until the wee hours. Glad to have some of our old brothers back for the celebration, namely, Schmoldt, Ferricks, Schilling, Stovsand, Adams, Bond Fesler and Doisey.

Our thanks goes to Mrs. Carl Lyons for graciously consenting to be our house mother for St. Pat's.

After the week end, a count was made of Fraternity pins, and a record for the house. The unfortunate, Charlie W. Heaking, Bill Magill, Ben Speak, Joe Hay and Floyd Wright, Congratulations fellows???

Hope everybody enjoyed the week end as much as we did, and will be looking forward to a bigger one next year.

Triangle

Triangle fared pretty well this year, not only having Bro. H. C. Brehe as St. Pat, the third member of Triangle in succession to be so honored, but also as the winner of the trophy for the best float in the parade.

Friday morning the fellows who could get up put the finishing touches on the prize-winning float and straightened up the house for the dates who were to take over the house for the weekend. By noon all the boys were moved out and comfortably settled in the Pennant Hotel.

Thursday night was open house, many members and their dates and fraternities strolled in and out of the house and danced to the music of many famous bands.

The rest of the dates arrived Friday afternoon and evening to

help along with the celebration. Dancing was carried on after the hours at the gym into the wee hours of the morning, once more.

Saturday evening Triangle held their traditional St. Pat's banquet with Bro. W. J. Hartnagel as M. C. and Bro. Mike Mazzoni as guest speaker both of whom made the banquet a gala affair. After the banquet the members adjourned to the gym where they danced to the wonderful music of Bob Strong and his orchestra, and after the dance they trooped back to the Rock House and continued the celebration. Many saw the old sun rise in most wonderful brightness to climax the celebration.

Sigma Nu

It is doubtful whether the entire Civil Department could have measured the strain exerted upon the foundation of the vibrating Snake House early Sunday morning as a fitting climax was noisily made to the annual reign of Saint Patrick. While the sturdier members of the Bob Strong orchestra held an impromptu jam session that rocked the population of Rolla streamed in from the vicinity of Jacking Gym and stayed to listen, to talk, or to do whatever happened to catch their fancy at the moment.

Only a few hours before in the same room one of the most successful tea dances yet sponsored by Gamma Xi Chapter was enjoyed by hundreds of guests who danced to the music of Charlie Faulkner's orchestra and sipped delicious Russian tea.

The throngs of guests who flocked in for buffet dinner Friday were afforded a treat in the form of tasty shrimp... shelled, incidentally, by a "spirited" group of loyal lads... and a preview glimpse of Miss Delores Purcey, the beautiful Sigma Nu contribution to the St. Pat's Court of Love and Beauty.

Congratulations are in order for Dick Howell, who lost his heart and his pin over the weekend to Miss Marty Renwick. Marty lives in Kansas City, which makes things rough for frequent get-togethers, but so far Dick appears to be holding up under the strain. Our sincerest thanks go to Mrs. Charles Millar, who capably foster-mothered our dates and who added greatly to the success of our receptions and parties.

Pretty girls,
One often notes,
Get precious pelts,
Off bald old goats.

Papers By Boyer And Kilpatrick Are Published

Professors Glen C. Boyer and A. V. Kilpatrick of MSM's Department of Mechanical Engineering have broken into print recently in national technical magazines. The March 1947 issue of DIESEL PROGRESS features an article by Prof. Boyer on p. 54, and Prof. Kilpatrick's article appears on p. 112 of the Jan. 30, 1947 issue of AMERICAN MACHINIST.

Professor Boyer is one of the newer members of the MSM faculty, having come to Rolla only last September. This article is by no means his first appearance in print, as he has had articles in many technical magazines over a period of years, including Power, Power Plant Engineering, Water Works Engineering, Oil Engine, Mechanical World, Diesel Power, Gas and Oil Power, Industry and Power, and Southern Power and Industry. Professor Boyer also is the author of "Diesel and Gas Engine Power Plants," published by McGraw Hill, and assisted in the revision of the Diesel Engine Manufacturer's Association "Standard Practices."

Professor Kilpatrick's article is entitled "End Pressure Holds Lenses Securely Against Face Plate," and describes a fixture used to machine thin Plexi-lenses. The Plexiglass lenses were held by pressure of a push rod, centered on the tail stock of the lathe against a collet chucked driver. The driver was faced with emery cloth to increase the friction between it and the lens, which was protected from abrasion with scotch tape. This fixture is applicable for any piece that has to be machined and cannot be chucked or turned between centers.

Professor Kilpatrick, who has been with the Mechanical Department at MSM since 1926, has previously had articles appear in Power, American Machinist, and Machinery.

Miner: "Have you had any experience in defense work?"
Co-ed: "I'll say I have! I used to go with a sailor."

CVA SUGGESTION BOX

By Joe Hepp

From all indications noted Monday morning, the weather failed in the attempt to spoil the annual St. Pat's Celebration. The only comments thus far seem to concern the number of days between now and the end of the month for those that are not to sharp yet, I mean "pay day." Oh yes, I overheard a couple fellows being thankful that New Years and St. Pat's were separated by a lengthy period of time.

Returning to the more serious side of the story, I would like to thank the people concerned in arranging the special cafeteria schedule and also those rendering their services to help provide rooming facilities for the visitors. The only sad part is the fact that the whole arrangement was almost a complete failure. Of the FIVE persons signing up for cafeteria tickets, only ONE person attempted to obtain the same accommodations for his date. Maybe we misjudged the wealth of the average student or what have you, for this was an excellent chance to conserve on the monthly income. A written suggestion, plus numerous verbal requests, brought forth the cafeteria schedule as was posted. The same old cry went around about housing conditions, then when provisions were made to eliminate the said conditions a mere three or four students took advantage of the service. According to the saying, we'll let "bygones be bygones," but please keep in mind that the school has been very cooperative with the C. V. A. and this type of response or spirit certainly will not better conditions.

I might also point out that I'm not trying to air personal gripes for this failure to respond seems to be quite prevalent at times. There are undoubtedly sound reasons in many instances for the present conditions, so we will chalk

it up to experience and proceed. The facts are given for your information and to keep the rumors at a minimum.

SUGGESTION: I suggest the C. V. A. arrange to offer some form of entertainment to help increase the attendance at the regular meetings. It seems to be a custom of the other organizations to have present a speaker or some interesting means of gaining attendance.

ANSWER: The C. V. A. is aware of that fact and they are going to furnish a new type of entertainment for the meeting to-night, in deep contrast with the Estella Liebling Singers presented by the school, the C. V. A. will present a real "Bill Billy" band. Some of the members have already heard the band play and they claim the fellows are pretty good with their style of music. Our organization hasn't always been without some form of entertainment, but the larger the turn-out the better the entertainment will be. I would like to remind you that the professional football picture of the play-off between the Chicago Bears and Chicago Cardinals was sponsored by the C. V. A. The program committee is attempting to obtain pictures of the last World Series at the present time.

SUGGESTION: One of the most difficult pieces of equipment to locate around this campus is a pencil sharpener. Suggest the school purchase some more; thus increasing the chances of finding one or furnish a good map so they can be located.

ANSWER: It is true that pencil sharpeners are not too numerous, but considering the facts again, they are in most cases sufficient. At one time they could not be obtained but are coming through now. Most every department, if not all, have a pencil sharpener, but as you say, not in a conspicuous place. When placed in the hall they seem to disappear or in part anyway. I suggest that you consult the various instructors where the sharpeners can not be found otherwise.

SUGGESTION: Although knowing the exact details of the last railroad tragedy in Rolla, it still brings to mind the need of warning lights for some of the crossings. There are several "blind spots" at these crossings and the danger in such cases is great. There is no reason in my mind to wait for a larger death toll, so I recommend the C. V. A. use their influence and power in helping to remedy this condition.

ANSWER: How well I agree with the suggestion for I almost had a tie race at the 12th Street crossing myself. The thing is that I was unaware of the race until I noticed the engine staring me in the eye. The suggestion will be passed on to our representative of the city council and the C. V. A. will give it full support.

LIBRARY NOTICE

In reply to the person who asked in this column of February 19, 26 that the Library purchase some Latin texts and a small Latin dictionary, the Library has recently received a gift of these and they are now ready for circulation.

Newsworthy Notes for Engineers

What is CV?

CV is the answer to a tough problem. It stands for Continuous Vulcanization—a process developed by Western Electric engineers to speed-up and improve production of rubber-insulated telephone wire. It proved so efficient a process that more than thirty outside manufacturers have introduced CV into their plants.

Under previous methods, the rubber compound was fed by hand into a forcing or tubing machine which extruded it upon the wire. The conductor with this unvulcanized covering was coiled in pans in a layer of powdered soapstone and sifted chalk, with each flat coil separated from its neighbor by another layer of soapstone and chalk. The insulated wire in the soapstone and pan was afterwards placed in a steam vulcanizing oven and cured for approximately 45 minutes. An additional reeling or coiling operation was required and the complete process took from one to three hours depending on the insulation wall thickness.

Now the continuous insulating and vulcanizing machine—developed and built by Western Electric engineers—does the whole job in one operation. Rubber compound and bare wire are both fed continuously into one end of the machine and then through steam at high pressure which cures the rubber insulation in approximately 7 seconds. The insulated wire is taken up on reels in continuous lengths up to 30,000 feet in a fraction of the time required under the old panning process.

Manufacturing telephone and radio apparatus for the Bell System is Western Electric's primary job. It calls for engineers of many kinds — electrical, mechanical, industrial, chemical, metallurgical — who devise and improve machines and processes for large scale production of highest quality communications equipment.

Western Electric

A UNIT OF THE BELL SYSTEM SINCE 1882

Halving the steps on Step-by-Step

Simplifying production of over 1,000,000 Step-by-Step "banks" per year—for use in dial telephone exchanges—gave Western Electric engineers an interesting assignment.

One of several types of "banks" consists of 200 brass terminals, assembled in 10 levels, the terminals of each level accurately positioned on a crescent shaped phenol fibre insulator which separates them from the next level. The entire assembly occupies a space of 6 1/2" x 2 1/4" x 1 1/2". Initially, banks were made in ten steps: (1) spray varnish on phenol fibre strips; (2) punch insulators from these strips; (3) punch individual terminals from coils of brass sheet; (4) assemble a preliminary pileup, picking up each terminal by hand—200,000,000 per year, and accurately positioning it on the varnished insulator; (5) bake; (6) compress to secure terminals to varnished surface of insulators and then dismantle preliminary pileup; (7) make final assembly, inserting additional insulators and spacers; (8) bake; (9) compress and tighten clamping screws; (10) cut off excess length of screws and line beam mounting holes.

Western Electric engineers streamlined these ten steps into five: (1) punch insulators from unvarnished phenol fibre strips; (2) punch terminals, leaving them connected to each other, and wind into rolls; (3) automatically separate terminals from roll and cycle to insulators in punch press equipped with dial feed tools; (4) make final bank assembly; (5) compress and tighten clamping screws.

Results—a 30% reduction in manufacturing cost, an improvement in quality, and more economical utilization of manpower and facilities.

Highlight of The St. Pats. Celebration, The Coronation Ceremony

Highlighting the entire celebration, was the beautiful coronation of the queen. Members of the St. Pats Board stand to the left of the brightly decorated throne and the beautiful maids of honor on the right. From left to right on the throne: Page Boy Costello, retiring queen Lenore Jones, queen Louise Freeman, St. Patrick Harold Brehe and Page Boy Greco. By Esquire

It Must Be Jelly

One of the most novel costumes displayed at the Costume Ball on Friday evening was this one worn by Jerry Berry. His wife stands at his side. She's the one who looks like a woman. Other costumes were of pirates, Arabians, ballerinas, rabbits and many hobos. By Rother

Arriving For The Celebration

"It started like this", one girl said, "I arrived on the train Wednesday night for a three day good time." Like the other several hundred out-of-town girls, she no doubt did. By Esquire

St. Pat Being Thrown Out

A group of feager students decided to throw St. Pat out of Parker Hall Auditorium during the knighting ceremony after St. Pat had several of the people in the audience thrown out. Another group of students went to the rescue of St. Patrick and saved him further embarrassment; he continued. By Rother

The Awaited Arrival

The big moment when St. Patrick arrives on the handcar at the Frisco railroad station. Guards of the old gentlemen guides the car through the vast host of people were at the station to see his arrival. On the car by his sides are the two pages, in brightly colored green uniforms. By Rother

The Royal Knighting

St. Patrick in a calm dignified manner, pictured above, knights the seniors before an overflowing crowd in Parker Hall Auditorium after the parade on Friday afternoon. By Valda

Royal Couple

The queen of St. Pats, Miss Louise Freeman shown with St. Pat, Harold Brehe, as they receded from the throne to conclude the coronation exercises.

The Parade

This is a general view of the parade as it proceeded up Pine St. In the background the Kappa Alpha, Sigma Pi and T triangle floats may be seen. By Esquire

This scene captures a part of the multitude of merry makers who traveled from one fraternity house to another on Thursday evening when all fraternities declared open house to all. By Esquire

The Winning Float In The Parade

The winning float in the parade was this float prepared by the men of Triangle fraternity. Closely beside the float is Coolidge of Triangle. Last year the Triangle float won second place in the campus competition and the Pi Kappa Alpha float won first. By Esquire

SPORT SHORTS of ALL SORTS with BERRY

Kirkville Teachers, M. I. A. A. representative in the collegiate basketball tournament at Kansas City last week, held their own until the semi-finals. They easily defeated their first two foes and finally fell to the Arizona State five. Kirkville wound up their season with 31 wins and 2 losses. Don't forget the starting five were all freshmen, next year's team should be equally as great. In the 33 games Kirkville played, the Miners were one of 3 teams to have a half time advantage. Marshall College of West Virginia won the tournament.

Abe Stuber, Cape Girardeau's great football coach, has accepted the football post at Iowa State College. This again brings the M. I. A. A. into national limelight. Abe coached at Cape for 19 years and had a fine record. We all wish him luck in the big time — he's really bucking some tough competition now, but then he should have more material. — Against Gale Bullman, Miner Coach. Abe Stuber had a record of 3 wins and 3 losses. Incidentally, Abe's departure from the M. I. A. A. might help bring the M. I. A. A. football conference championship to Rolla next year. In 1936 the Miners 35-0 victory is the worst defeat Cape has ever absorbed.

In the swimming meet against St. Louis U, the visitors' star

swimmer, Jim McKenna, broke the pool record in the 220 freestyle here. Over the past weekend he broke two more records in the Missouri Valley Conference. He is being groomed for a spot on the Olympic team.

Tentative date of the showing of the World Series films in April 9th. This film will be shown under the auspices of the Campus Veterans Association.

The sudden increase of athletes sporting new M sweaters and jackets around the campus is the result of the late arrival of the long awaited football letters. Last week found the basketballers, swimmers, and footballers all receiving their awards. A meeting of the M Club will soon be announced. This organization has been inactive during the war and will soon be reactivated.

Al Wilkins, equipment manager, is all smiles. He survived the St. Pat's holiday without incident. Several years ago the pool was drained to keep St. Pat's celebrators from going swimming. During the celebration a high diver dove from the balcony into the pool only to discover that it had been drained. He was but slightly injured.

With intramural boxing coming up soon, look for victories by

B & B?

Little Jack Horner
Sat in a corner
Pulling his hair in a pout.
"I'll go crazy," he said,
As he beat on his head,
"Till I find out what
B. B.'s about."

Stone, Duke, Ryan, Liddell, Hobel, man and McKenzie. The heavy weight brawl between "Bear Track" Shourd and "Moose" Carafiol should be a dandy, if they survive preliminaries.

Tommy Sullivan, former light weight boxing champion of the world, will referee the intramural contests.

You six footers around the campus better watch out. Coach Gale Bullman is planning a campaign to unearth some ends for next year's football team. Last year's ends have dwindled to 2, Hazlett and Jones are seniors, Joe Good and Bill Teas have withdrawn from school. McGrath will be moved to fullback, his regular position before the war. That leaves Geo. Eadie and Don Heath to carry the burden. Heath has a questionable back. Bill Diesmantel and Al Rogers are expected to make strong bids.

All golfers with intentions to compete for the varsity team should report to Coach Gale Bullman in the Athletic Office immediately.

Rolla Bicycle Club Welcomes Miners To Their Group

Until a short time ago the bicycle in Rolla was merely something for youngsters to play around on and for the oldsters to use as a means of transportation to and from classes or work. Today Rolla boasts of the Rolla Bicycle Association, a club run by bicycle enthusiasts. At present the organization is still in a primitive state, but the membership is a good cross section of Rolla's population. Some of the members and officers are students at the School of Mines and some are from Rolla High School, while others are local business people. All are united by a common interest — the enjoyment of cycling along the picturesque roads of America's highways.

The aims and plans of the club are simple: to further good fellowship and introduce people to a new kind of recreation.

Despite adverse weather conditions, several group trips have already been made and plans are being made for outings to Yancy Mills, Gourd Creek Cave, and Monks State Park.

The president of the group, Mr. Dudley S. Lynch, an instructor in the English Department of the School of Mines, wishes to extend a cordial invitation to all the students at the School of Mines and to the people of Rolla who are interested in bicycle riding. Meetings at present are being held at Knutson's Bike Shop at 103 East Sixth Street until a more suitable location can be found. Mr. Lynch and Mr. Knutson are confident of the success of the new organization especially during the coming spring months. All those interested in joining the organization are urged to contact either Mr. Lynch at the School of Mines or Mr. Knutson at Knutson's Bike Shop.

Harold Brehe Enacts St. Pats Role This Year

This is the third time a member of Triangle has had the honor of being St. Pat. This year the responsibility of fulfilling the role of jovial St. Patrick was put on the shoulders of Harold Conrad Brehe who did a superb job considering he nearly lost his voice during the Nightingale Ceremony. "Manure Spreader" as he is now known is a St. Louis boy at heart who has spent nearly three years of his life here in the E. E. department. He is a junior and a member of the St. Pat's Board and has been a member for two semesters.

At an interview with Harold, he said that he wanted to thank the guards and the pages who were of so much help during the ceremonies. He also stated the seniors who were unable to receive their knighting certificates could see him on the campus or call him at 122 and he would see to it that they get one. He expressed his sorrow that he was unable to knight all of them but there are well over 250 seniors on the campus.

Although St. Pat was the main object of the ceremony there still had to be others to help him put across the frolics and merry-making, namely the pages and guards. The guards had to be persons with physical power and authority and as can well be remembered, they were well represented. They were Beverage or Carfoll both being seniors and football players. The pages were not nearly as large physically but they did a splendid job. They were Louis Greco of Theta Kappa Phi and August Castelli of Pi Kappa Alpha, both Freshmen.

"Manure Spreader" Brehe is still wondering what happened to the Blarney Stone after the attempted kidnapping was thwarted by a group of loyal subjects.

A leg is something that if you ain't got two pretty fair ones of, you can't get to first base.

New Frat., Tau Kappa Epsilon, Installed Here

By Fred Winters

Beta-Eta chapter of Tau Kappa Epsilon Fraternity was installed at MSM on Saturday, and Sunday, March 8 and 9. TKE is one of the largest national fraternities in the country today. Members of TKE, better known as TEKES, have been active on the campus for the past few months as a colony, but are now charter members of TKE.

The installation ceremonies, first of their description on the campus for quite some time, began Saturday morning and continued through Sunday. They ended Sunday evening with a banquet at the Pennant Tavern and Restaurant.

The initiation, carried out with the modern mode of initiation and not the old-fashioned use of the paddle and other instruments of torture, was under the direction of Fred Kettlekamp, Assistant Dean of Men at Washington University in St. Louis. He was assisted by several members of the TKE chapter at Washington University.

The charter, establishing the chapter here, was given to President Lloyd Youngs by Dean Kettlekamp at the dinner Sunday night. The invocation at the banquet was given by the Rev. Scott Porter, Dean Curtis Wilson, of MSM, talked on "Aristocracy of Service" and Dean Kettlekamp spoke on "Why Fraternity". Several members from the chapter at Washington University, the chapter at Missouri University, and presidents of several other fraternities on the campus also attended the banquet.

The TEKES elected the following men as their first officers: Lloyd Youngs, Prytanis; Warren Robinson, Epi-Prytanis; Bernard Roach, Grammateus; Charles Fallis, Crysochylos; Fred Winters, Histor; Sal Rivello, Pylotes; Stanley Seales, Hypophetes; and Charles Seabourne, Hegemon. Dr. Marion J. Caldwell, of the MSM chemistry department, will act as faculty advisor of the chapter.

Mr. Winslow Is Added To Student Counseling Bureau

The Student Counseling Bureau, (located in the left rear of the Veteran's Administration Office), hitherto consisting of Mr. J. R. Pollard, has added new talent to its roster in the form of Mr. J. D. Winslow. The new counselor is a veteran of World War II and served with the Field Artillery attached to the 6th Division.

Mr. Winslow received his B. S. and M. E. degrees from Missouri University in 1942 where he specialized in guidance and counseling with emphasis upon psychology, statistics, tests and measurements. After his term of service in the army, he served as a counselor

Notice

University Dames will meet Thursday evening, 7:30, in Room 194, Norwood Hall. Guest speaker for the evening is John Den Besten, MSM student, who brings along his pictures to give an illustrated talk on Crab Apples and the many varieties, and some of the uses, too.

All student wives are invited to attend, not only to hear the program, but to prepare for next month's election of officers, to get acquainted with new people who are student wives, too.
